Outside oncology consultation

Patient ID: SYN-003

Document date: 2024-11-20

Consultation summary

Ms. Doe was seen for a second opinion on metastatic colorectal cancer. Her tumor is microsatellite stable. Pembrolizumab was discussed as a possible option on a basket study, but she declined and it was not started. We reviewed second-line chemotherapy and recommended FOLFIRI, which she began in December 2024. She will continue care with her local oncologist.
