Hematology follow-up

Patient ID: SYN-003

Document date: 2023-06-12

Visit note

Ms. Doe is seen for routine survivorship follow-up. She has a history of classical Hodgkin lymphoma, stage IIA, diagnosed in February 2022 and treated with six cycles of ABVD completed in August 2022; PET-CT in October 2022 showed a complete metabolic response and she remains in remission. She also had mild iron-deficiency anemia in early 2022 that has resolved with oral iron. She reports good energy and walks daily. Plan: annual survivorship visit and repeat ferritin in six months.
