Radiology report

Patient ID: SYN-004

Document date: 2026-06-01

CT chest, abdomen and pelvis with contrast

Comparison: CT dated 2026-02-27.

Liver: multiple hypodense lesions; the largest, in segment VII, measures 3.4 cm (previously 2.6 cm).

Lungs: mild bibasilar dependent atelectasis. No pulmonary nodules. No pleural effusion.

Impression: progression of hepatic metastases, measurable by RECIST 1.1.
